Press the rectangular button to open the lock completely.

SILICONE TOURNIQUETS: **TECHNICAL & ORDERING**

TECHNICAL SPECIFICATION

Classification	Class I medical device, non-sterile
Compliance	EU MDR 2017/745 • UK MDR 2002 • UKCA and CE marked
Intended use	Reusable venous tourniquet for venipuncture and blood collection; transient contact with intact skin
Use type	Multi-patient use following cleaning and disinfection as described in the IFU
Band	High-quality silicone, latex-free
Buckle	ABS plastic; quick and slow release; storage clip
Sizes	Adult 610 × 25 mm; paediatric 410 × 15 mm (length ±10 mm)
Packaging	Individually packed or bulk packed

VALIDATION & BIOLOGICAL SAFETY

Reprocessing validation	Simulated reuse, protein residue testing, device condition: acceptance criteria met
Cytotoxicity	ISO 10993-5: non-cytotoxic
Sensitisation	ISO 10993-10: no sensitisation observed
Irritation	ISO 10993-23: acceptance criteria met

Testing performed on the finished device after cleaning and disinfection in accordance with the IFU. Reports available on request.

CLEANING & DISINFECTION

If visibly soiled: clean with mild soap and water to remove visible contamination. **After each use:**

01
DISINFECT
Wipe all surfaces with a 70% IPA wipe.

02
DRY
Allow to dry completely before use or storage.

03
INSPECT
Check band and buckle for damage before reuse.

Always follow the Instructions for Use (IFU).

CUSTOMISATION OPTIONS

- Logo printing on the buckle
- Choice of standard silicone band colours
- Your own silicone band colour

Logo on the buckle	Adult	800
Own silicone band colour	Adult	800

Volume discounts are available based on order quantity. Contact us for a quotation.

WHY CHOOSE REUSABLE SILICONE TOURNIQUETS?

- Reduced clinical waste
- Fewer replacement purchases
- Defined reprocessing procedure
- Repeated daily clinical use
- Optional logo on the buckle

YOUR BRAND, **YOUR IDENTITY**

Custom-branded elastic tourniquets carry your logo, colours and patterns across the whole band, giving a consistent, recognisable presence in everyday clinical use.

KEY FEATURES

- Fully customised band design: logos, colours, patterns
- High-quality elastic textile band
- Lightweight and comfortable for the patient
- Quick and controlled release mechanism
- Universal size

TECHNICAL INFORMATION

- Class I medical device
- EU MDR 2017/745 and UK MDR 2002
- Polyester elastic band with ABS plastic components
- Single-patient use
- For reuse on the same patient, clean with alcohol-based wipes as described in the IFU

CUSTOMISATION

- Design developed to your requirements and brand guidelines
- Visual approval before production

BENEFITS

- Ideal for branding and private label
- Cost-effective for larger quantities

PRE-DESIGNED **ELASTIC TOURNIQUETS**

COLOURS THAT CARE: READY-MADE DESIGNS FOR QUICK ORDERING
